No Drilling. No Digging. No Risk.

FREE STAND™ Plastic Hoarding

Product Overview

FREE STAND™ Plastic hoarding fences are versatile and durable barriers commonly used in construction sites, events, and other temporary settings.

These fences play a crucial role in controlling access, enhancing safety, and demarcating boundaries.

Unlike traditional fencing materials such as wood or metal, plastic hoarding fences are specifically designed to be lightweight, easy to install, and resistant to environmental elements.

One of the significant advantages of plastic hoarding fences is their modular design. These fences often consist of interlocking panels or sections, allowing for easy assembly and disassembly. This modularity makes them highly portable and adaptable to various site layouts and adaptable for floor-to-ceiling dust tight screening during fit out and refurbishment works in live retail.

Features & Accessories

Durable

Designed to withstand the rigours of outdoor use. They are resistant to moisture, UV rays, and harsh weather conditions, ensuring a longer lifespan compared to traditional fencing materials.

Compliance

Plastic hoarding fences comply with relevant safety and construction regulations. This ensures that they meet industry standards for strength, stability, and overall safety.

Customisation

Plastic hoarding fences come in different colours and can be customised with company logos, warning signs, or other informational panels.
