

FREE STAND™ RB22 Barrier

Product Overview

The RB22 Water-Filled Barriers feature a dynamic design that prioritizes adaptability. With an interconnected modular system, these barriers can be easily shaped to suit various terrains and applications. From urban landscapes to construction sites, the RB22 delivers a versatile solution for safety and control.

These barriers are engineered to withstand external forces and wind speeds of 78mph while offering an effective barrier system for traffic control, pedestrian safety, and event management. They are equipped with reflective surfaces, these barriers ensure optimal visibility day or night, enhancing safety by clearly marking boundaries and guiding traffic effectively.

The RB22 is designed with a strong commitment to safety, meeting and exceeding industry standards. Trust in a barrier system that not only enhances security but also reinforces your safety protocols.

Features & Accessories

Versatile

Their adaptability and durability make them a reliable choice for delineating spaces, guiding traffic, and ensuring the safety of both pedestrians and workers.
